600 Power Variations mit bis zu 6 unterschiedlichen, galvanisch getrennten Ausgängen auf einer 19"-Europakarte mit 6 oder 8 TE

600 power supply variations with up to 6 different, galvanically isolated outputs, mounted on a 19" EuroCard with 6 or 8 TE

Beschreibung

Mit der MTM Power Karte der Serie MPK1 kann der Anwender im 19"-Bereich eine ungeahnte Vielfalt von Möglichkeiten erstellen. Aus der Serie der vergossenen Stromversorgungsmodule PMA, PMAS, PMN und PMG lassen sich rund 600 verschiedene Stromversorgungs-Versionen als 19"-Einschub realisieren.

Die MTM Power Karte ist universell ausgelegt, so dass alle Leiterplattenmodule der Serie PMA, PMAS, PMN und PMG, beginnend ab einer Ausgangsleistung von 15 Watt bis zu 48 Watt, in Single- Dual- oder in Triple-Ausführung, untergebracht werden können.

Mit der MTM Power Karte lassen sich Stromversorgungs-Variationen in Sekunden realisieren. Auf Wunsch kann auf der Frontplatte für jeden Ausgang eine separate LED-Anzeige vorgesehen werden. Die Kombinationsmöglichkeiten bestehen zwischen allen Modulen mit gleicher Eingangsspannung. Da bei den Stromversorgungsmodulen selbst kundenspezifische Ausführungen über gleiche Abmessungen und Anschlüsse verfügen, lassen sich auch Sonderausführungen mit Standardmodulen kombinieren.

Description

With the MTM Power Card of the series MPK1, an unexpected variety of possibilities can be created for 19" applications. Approx. 600 different power supply variations as 19" plug-in can be realised out of the series of encapsulated power supplies PMA, PMAS, PMN and PMG.

The MTM Power Card is universally designed in a way that all modules for PCB mounting of the series PMA, PMAS, PMN and PMG – starting from an output power of 15 watts up to 48 watts, either with single, dual or triple outputs – can be mounted on the card.

With the MTM Power Card, power supply variations can be realised in seconds. If requested, a separate LED for each output can be included on the front plate. All modules with the same input voltage can be combined with each other. As customized power supplies have the same dimensions and pinning, even these power supplies can be combined with standard modules.
